NEWSLETTER

Volume -I ISSUE- I

From the Desk of Chairman

In the pursuit of learning, I believe that each & every student should have the conviction & passion to go beyond limitations ,overcome challenges & garner themselves. It lays a positive attitude which indeed manifests constructive thinking & enables all the students to build strength & confidence in themselves.

Modern School , Noida aims to provide developmental education & holistic scaffold to each & every child. It prepares the students for life, as harbingers or stalwarts of ideal upbringing.

The scenario of present times where education through online mode has transformed the whole concept of teaching learning , a lot of challenges in terms of technology & workspace both for teachers & educators turned up. However, on the other hand, the post pandemic framework have given us the variety of teaching learning methods & modes.

I wish all the students progress towards their goals & achieve what they desire.

Everyday is a chance to begin again. Don't focus on the failures of yesterday, start today with positive thoughts & expectations.

Mr. S. K. Jain
Chairman

APRIL 2022 - JULY 2022

From the Desk of Principal

"Education is not preparation for life; education is life itself."

It gives me immense pleasure to pen down my thoughts for this newsletter - Post pandemic the scenario & scaffold in the field of education has brought a quantum leap engulfing various digital means of teaching & learning.

The post COVID challenges have been innumerable. However, the physical, psychological and emotional strength has been eventually restored to normalcy and now we are putting forth our focus on the physical, mental and emotional strengthening of our students. For physical fitness, we have the state of art infrastructure in our School premises not only to participate in a group or individual games but, to develop their innate abilities and skills to the optimum levels. We have also developed new avenues in terms of games and sports to hone the skills of our students.

In accordance to NEP 2020, our School curriculum focuses on to make India and our students 'Global Knowledge Superpower'. Our students' clubs regular meets are based on multi-disciplinary subject enrichment activities. It is the right time that we all must focus on building a generation that is considerate to the environment around us. They should take responsibility for their actions to care for the world, to become compassionate beings and citizens. We all must ensure to organize drives, campaigns, street plays & so on every year to create awareness amongst the students and masses. Children need to know that caring for the planet always starts at the micro level and everything they do, both big and small, can make a real difference. The activities should primarily, ponder over on critical thinking, discovery, inquiry, discussion, and holistic learning / situated learning.

Lastly, I just want to give three inspiring mantras to my students for a contented life viz. strive for knowledge, ready to accept challenges and always be confident that you are a leader.

Dr. Neeraj Awasthy
Principal

APRIL 2022 - JULY 2022

SPECIAL ASSEMBLIES
